1st paper: Working from home during COVID-19 crisis: a cyber security culture assessment survey (Anna, 2021).

2nd paper: Cybersecurity in Working from Home: An Exploratory Study (Mary, 2021)

1. Familiarise yourself with the purpose, problem, objective or research question of each paper. Are they in line with your experience or thoughts on the topic, contributing to the collective body of knowledge in this area?

A: 1st paper:
Purpose: research how the employees of different sectors are familiar with the cyber security measures and how they will deploy them.
 Problem: Due to the virus crisis, more employees are working from home, risk of cyber security has become a popular concern.bjective: Through the survey and research, find out if there are any technical or practical suggestions to enhance the cyber security measures and employees' knowledge while working from home becomes popular..
 Research questions: Including the ability to work from home, any security guidelines from employer, what security measures on hardware/software while from home, etc.

2nd paper:
 Purpose: To explore the potential cyber security threats, by using different technologies.
 Problem: Working from home becomes popular around the globe, and both the human factor and the vulnerabilities of technologies are causing a potential cyber security threats, which may cause the data loss and damages of the enterprises.
 Objective: Explore the both the technologies and human behaviours which will cause cyber security vulnerabilities, with suggestion and solution.
 Research question: The paper has explored and research every possibility of cyber security threat, in cases, from using different technologies to the human behaviour for working from home.

2. Is the research methodology utilised in each paper appropriate for the stated purpose or question?

A: Yes, for both papers. The 1st paper has a survey for employees from different industries to research their habit of working from home; 2nd paper has explored every possibility, including technologies and human behaviour, to research the potential cyber security threat while the people are working from home.

3. In terms of data collection and analysis, is this also appropriate for the stated purpose or question? (We will discuss this further in upcoming units.)

A: Yes, for both papers. The 1st paper has analysed the cyber security issue, combining the culture of the enterprises, the nature of the roles of the employees, and the technologies they use.
For the 2nd paper, it has suggested different cases and technologies, which meets its stated purpose: exploration.

4. Does each paper support its claims and conclusions with explicit arguments or evidence?

Yes. 1st paper supported its claims by analysing the results of the survey.
2nd paper supports its claims by academic studies and case studies, also the interview with some users.

5. How would you enhance the work/paper?

1st paper: Some case studies' support will be better
2nd paper: A survey may enhance the work.
